FAQ

FREQUENTLY ASKED QUESTIONS

GENERAL

Are your products sustainable?

Our ambition is to make greener choices every day. The result of this can already be found in a few products. Think of the 'Global Organic Textile Standard' label of the Oslo and Per series, the Dix and Sawa baskets made from Bamboo and recycled PET, Jura bath mats made from recycled PET or our other series made from natural materials.

TEXTILE

How do I wash my towels?

The majority of our towels can be washed at 60°. Do you prefer to wash them at 40°? No problem! This way your towels will last even longer and its more environmentally friendly! Ironing and drying instructions vary from product to product. That's why you should look carefully at the instructions for your product on the care label. It's best not to let wet textiles dry in the sun. This can cause the colors to fade.

How do I wash my bath mat?

It is important that you put the bath mat in a washing bag. This will protect the bath mat from friction in the drum and keep the mat maintain its look. The bag also catches fluff, so nothing remains in the machine. After washing, you can easily dispose the dirt in the bin. Not every product has the same maintenance instructions. Therefore, look carefully at the instructions of your product on the washing label.

Do not hang your bath mat to dry vertically. This may cause it to deform. Place it rather horizontally on a drying rack. Wet textiles should not be left to dry in the sun. This may cause the colors to fade. It is advisable to wash the Bath mats as little as possible. Most mats are so large that they absorb a lot of water in the washing machine. The mat becomes heavy and dries slowly. If you don't stand on the mat with your shoes on, regular washing may be unnecessary.

My bath mat absorbs little water

Chances are that your mat consists of synthetic material. This has a lower absorption capacity than a natural fabric such as cotton. Part of the water remains on the surface, which means it dries faster than natural fabric. It depends on what you find more pleasant.

My bath mat dries slowly

Chances are that your mat consists of a natural material such as cotton. This has a higher absorption capacity than a synthetic fabric. It takes longer for the mat to dry, but your feet remain drier as the water won't lay on the surface. It depends on what you find more pleasant.

Are the anti-slip backings suitable for underfloor heating?

Yes they are! All of our bath mats are suitable for underfloor heating.

How do I wash my bathrobe?

Not every product has the same care instructions. Look carefully at the instructions of your product on the care label. Wet textiles should not be allowed to dry in the sun. This can cause the colors to fade.

BASKETS

Can I wash my laundry and storage baskets?

Read the washing instructions on the label on the inside. Preferably wash the baskets in a laundry bag. Does the product not carry a washing label? Then it is not suitable for washing. It is best not to let wet textiles dry in the sun. This may cause the colors to fade.

My laundry basket does not stay upright. How do I solve this?

Laundry baskets with a thinner fabric often loose shape when they aren't filled with laundry. Steaming may help to maintain the shape. Push the basket into the desired shape by hand. Steam the basket to fix the shape as best as possible. Avoid direct contact between the material and the steamer.

ORGANIZERS

How do I maintain my wood products?

Most types of wood shrink or expand in cold or warm temperatures. This does not affect the quality. The wooden bath mats are not suitable for use in the shower. In very humid, small rooms, it is recommended to dry the products regularly. The wood has been given the necessary treatments, but constant exposure to moisture can damage the varnish in the long term. Do not let the product dry in the sun. This may cause it to fade.

How do I take care of my steel products?

The steel products require little or no maintenance. In very humid, small spaces it is recommended to dry the products regularly. Constant exposure to moisture can damage the product.
